

# **INVENTORY MANAGEMENT SYSTEM FOR RETAILERS**

## **CLOUD APPLICATION DEVELOPMENT**

**TEAM ID: PNT2022TMID39817**

**TEAM LEADER: KIRANDHARSHAN**

**TEAM MEMBER 1: GOVINDARAJ**

**TEAM MEMBER 2: SRIGANTH**

**TEAM MEMBER 3: PRATHAP**

# Project Report

## 1. INTRODUCTION

### *1.1 Project Overview*

Retail inventory management is the process of ensuring you carry merchandise that shoppers want, with neither too little nor too much on hand. By managing inventory, retailers meet customer demand without running out of stock or carrying excess supply.

In practice, effective retail inventory management results in lower costs and a better understanding of sales patterns. Retail inventory management tools and methods give retailers more information on which to run their businesses. Applications have been developed to help retailers track and manage stocks related to their own products. The System will ask retailers to create their accounts by providing essential details. Retailers can access their accounts by logging into the application.

Once retailers successfully log in to the application they can update their inventory details, also users will be able to add new stock by submitting essential details related to the stock. They can view details of the current inventory. The System will automatically send an email alert to the retailers if there is no stock found in their accounts. So that they can order new stock.

## ***1.2 Purpose***

The primary purpose of inventory management is **to ensure there is enough goods or materials** to meet demand without creating overstock, or excess inventory.

## **2. LITERATURE SURVEY**

### **“A LITERATURE SURVEY ON MODELS OF INVENTORY MANAGEMENT SYSTEM FOR RETAILERS”**

#### **CASE STUDY I**

**TITLE:**A literature review and current trends

**PUBLISHER:** IEEE

**YEAR:** 2021

**ABSTRACT:** In recent years, the correct management of inventories has become a fundamental pillar for achieving success in enterprises. Unfortunately, studies suggesting the investment and adoption of advanced inventory management and control systems are not easy to find. In this context, this article aims to analyze and present an extensive literature concerning inventory management, containing multiple definitions and fundamental concepts for the retail sector. A systematic literature review was carried out to determine the main trends and indicators of inventory management in Small and Medium-sized Enterprises (SMEs). This research covers five years, between 2015 and 2019, focusing

specifically on the retail sector. The primary outcomes of this study are the leading inventory management systems and models, the Key Performance Indicators (KPIs) for their correct management, and the benefits and challenges for choosing or adopting an efficient inventory control and management system. Findings indicate that SMEs do not invest resources in sophisticated systems; instead, a simple Enterprise Resource Planning (ERP) system or even programs such as Excel or manual inventories are mainly used.

## **CASE STUDY II**

**TITLE:** Economic order quantity models

**REFERENCES:** Business Systems and Economics

**YEAR:** 2015

**ABSTRACT:** For the fixed order size inventory models, the economic order quantity (EOQ) model is most well-known. The basic EOQ model is a formula for determining the optimal order size that minimizes the sum of carrying costs and ordering costs. The model is derived under a set of restrictive assumptions, as follows:

- Demand is known with certainty and is constant over time.
- No shortages are allowed.
- Lead time of orders is constant.
- The order quantity is received all at once.

The EOQ model was presented originally by Ford W. Harris, in a paper

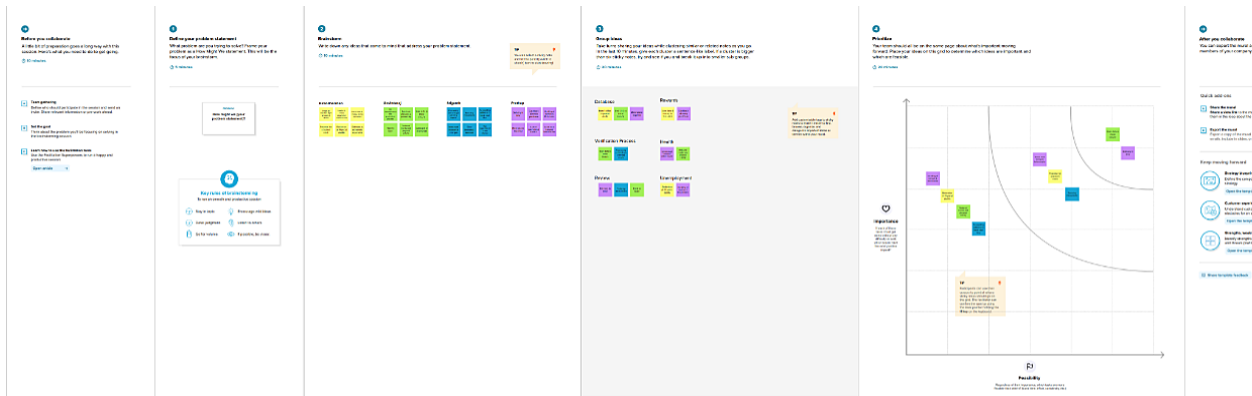

published in 1913 in *Factory, The Magazine of Management* (Harris, 1913). Many researches were made on the base of this model. However, the coefficients of the model may be fuzzy. One of the first who applied fuzzy theory was K. S. Park, who proposed a single product inventory model with fuzzy parameters on the base of the Harrison model (Park, 1987). Chen and Wang (1996), Roy and Maiti (1997), Yao et al. (2000) and Chang (2004) have extended the well-known EOQ inventory model to fuzzy versions.

### 3. IDEATION & PROPOSED SOLUTION

#### 3.1 Empathy Map Canvas

## 3.2 Ideation & Brainstorming

## 3.3 Proposed Solution

Kirandharshan's

Govindaraj's

Prathap's

Sriganth's

### 3.4 Problem Solution Fit

Kirandharshan

Define CS, JTintoCC	<b>1. CUSTOMER SEGMENT(S)</b> <span>CS</span> -The Cashier trying to pay for his purchased stocks.	<b>6. CUSTOMER CONSTRAINTS</b> <span>CC</span> -There is no boundary of using this application. -Because the user who is having knowledge of this application can work on it easily.	<b>5. AVAILABLE SOLUTIONS</b> <span>AS</span> -Mentioned problem will be solve by clearing the source code.	Explore AS, differentiate
	<b>2. JOBS-TO-BE-DONE/PROBLEMS</b> <span>J&amp;P</span> -The purchased parties are in different colors. -Which makes confusion.	<b>9. PROBLEM ROOT CAUSE</b> <span>RC</span> -The problem is caused due to some technical error.	<b>7. BEHAVIOUR</b> <span>BE</span> -The user/customer use different devices in their hands. -Customer can use this application regularly while comparing to others.	
Focus on J&P, JTintoBE, understandRC	<b>3. TRIGGERS TO ACT</b> <span>TR</span> -The application improves cash flow that motivates the customer to use the application.	<b>10. YOUR SOLUTION</b> <span>SL</span> -The problem marked is rarely occurred in the system. -It takes time to disable the defects. -After solving the problem customer can pay without confusion.	<b>8. CHANNELS OF BEHAVIOUR - Online</b> <span>CH</span> - Videos/content made the user to use the application. - Advertise online with influence to test the product and promote it.	Extract online, offline, CH, offB
	<b>4. EMOTIONS: BEFORE/AFTER</b> <span>EM</span> Before -The user/customer who never have used before makes them anxious. After - As the user/customer knows how to use this application then they will become comfortable and friendly with this environment.		<b>Offline</b> - To advertise through news paper.	

GOVINDARAJ

Define CS, JTintoCC	<b>1. CUSTOMER SEGMENT(S)</b> <span>CS</span> - The Student trying to get a practical research about inventory.	<b>6. CUSTOMER CONSTRAINTS</b> <span>CC</span> -There is no boundary of using this application. -Because the user who is having knowledge of this application can work on it easily.	<b>5. AVAILABLE SOLUTIONS</b> <span>AS</span> - Check the software and rectify the defects as soon as possible.	Explore AS, differentiate
	<b>2. JOBS-TO-BE-DONE/PROBLEMS</b> <span>J&amp;P</span> -Clear the bugs in my software and re-check the source code, rectify the problem. -While handling the software it has bugs.	<b>9. PROBLEM ROOT CAUSE</b> <span>RC</span> -The main cloud storage of the software is less -Some error occurred while developing the software	<b>7. BEHAVIOUR</b> <span>BE</span> -The user/customer use different devices in their hands. -Customer can use this application regularly while comparing to others.	
Focus on J&P, JTintoBE, understandRC	<b>3. TRIGGERS TO ACT</b> <span>TR</span> -The application improves cash flow that motivates the customer to use the application.	<b>10. YOUR SOLUTION</b> <span>SL</span> -This issue is commonly arrives in the software faced by many customers. -We will check the software and rectify the defects. -Helps the customer to feel easy while handling the software next time.	<b>8. CHANNELS OF BEHAVIOUR - Online</b> <span>CH</span> - Videos/content made the user to use the application. - Advertise online with influence to test the product and promote it.	Extract online, offline, CH, offB
	<b>4. EMOTIONS: BEFORE/AFTER</b> <span>EM</span> Before -The user/customer who never have used before makes them anxious. After - As the user/customer knows how to use this application then they will become comfortable and friendly with this environment.		<b>Offline</b> - To advertise through news paper.	

## SRIGANTH

DefineCS, fitintoCC	<b>1. CUSTOMER SEGMENT(S)</b> <span>CS</span> - The Worker trying to use to software for a year.	<b>6. CUSTOMER CONSTRAINTS</b> <span>CC</span> -There is no boundary of using this application. -Because the user who is having knowledge of this application can work on it easily.	<b>5. AVAILABLE SOLUTIONS</b> <span>AS</span> -Will be resolved with increasing the life time of the license.	ExploreAS, differentiate
	<b>2. JOBS-TO-BE-DONE/PROBLEMS</b> <span>J&amp;P</span> -Gets un-sync automatically after a year. -Which makes disappointed.	<b>9. PROBLEM ROOT CAUSE</b> <span>RC</span> -Expiry of license of the software in a year.	<b>7.BEHAVIOUR</b> <span>BE</span> -The user/customer use different devices in their hands. -Customer can use this application regularly while comparing to others.	
FocusonJ&P, tapintoBE, understandRC	<b>3. TRIGGERS TO ACT</b> <span>TR</span> -The application improves cash flow that motivates the customer to use the application.	<b>10. YOUR SOLUTION</b> <span>SL</span> -Common problem faced by many users. -Even though not a problem it is an stabilized cause of the software. -Will be solved by increasing the life time of the license for using the software	<b>8. CHANNELS OF BEHAVIOUR - Online</b> <span>CH</span> - Videos/content made the user to use the application. - Advertise online with influence to test the product and promote it.	Extract online, BoRline CH, offE
	<b>4. EMOTIONS: BEFORE/AFTER</b> <span>EM</span> Before -The user/customer who never have used before makes them anxious. After - As the user/customer knows how to use this application then they will become comfortable and friendly with this environment.		<b>Offline</b> - To advertise through news paper.	

## PRATHAP

DefineCS, fitintoCC	<b>1. CUSTOMER SEGMENT(S)</b> <span>CS</span> - The Customer trying to add products for billing.	<b>6. CUSTOMER CONSTRAINTS</b> <span>CC</span> -There is no boundary of using this application. -Because the user who is having knowledge of this application can work on it easily.	<b>5. AVAILABLE SOLUTIONS</b> <span>AS</span> -Will be solved by clearing the choices in the delete option in source code,	ExploreAS, differentiate
	<b>2. JOBS-TO-BE-DONE/PROBLEMS</b> <span>J&amp;P</span> -While deleting a single product in the list, the other products gets deleted.	<b>9. PROBLEM ROOT CAUSE</b> <span>RC</span> -This happens due to inability of the software to delete a single item.	<b>7.BEHAVIOUR</b> <span>BE</span> -The user/customer use different devices in their hands. -Customer can use this application regularly while comparing to others.	
FocusonJ&P, tapintoBE, understandRC	<b>3. TRIGGERS TO ACT</b> <span>TR</span> -The application improves cash flow that motivates the customer to use the application.	<b>10. YOUR SOLUTION</b> <span>SL</span> -The problem mentioned is said by many customers. -Working to solve it -Will be solved by clearing the choices in the delete option in the source code.	<b>8. CHANNELS OF BEHAVIOUR - Online</b> <span>CH</span> - Videos/content made the user to use the application. - Advertise online with influence to test the product and promote it.	Extract online, BoRline CH, offE
	<b>4. EMOTIONS: BEFORE/AFTER</b> <span>EM</span> Before -The user/customer who never have used before makes them anxious. After - As the user/customer knows how to use this application then they will become comfortable and friendly with this environment.		<b>Offline</b> - To advertise through news paper.	

## 4. REQUIREMENT ANALYSIS

### 4.1 Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User login	Login with username Login with password
FR-4	Centralized Record of all product	Product name, Stock keep unit, brand, retail price, product category, lot number , expire date, vendor details, wholesale cost, minimum reorder amount, case quantity amount, reorder lead time
FR-5	Stock location identification	Provide number label for-Shelf, Rack and Boxes
FR-6	Periodical stock checking	Physical counting and Cycle counting
FR-7	Integration of sales and inventory data	sales administration and database upkeep FIFO, LIFO according to the goods
FR-8	Purchase management and Forecasting	Order review and placement, Avoid risk stock, review product, priorities purchases based on an item's profitability, popularity, and lead time, ABC, FSC, XYZ, JIT techniques
FR-9	Markdown and promotion	Show product discount, Maintain enough stock on hand to meet demand.
FR-10	Management of Receiving Stock	Accurately recording goods on an inventory
FR-11	Returns Management System	Check for damage or defects and return to vendor as needed If sellable add it to inventory counts
FR-12	Determination of dead stock	Return to the vendor for credits
FR-13	Inventory KPIs (Key Performance Indicator)	Sale KPIs, Receive KPIs, Operational KPIs, Employee KPIs

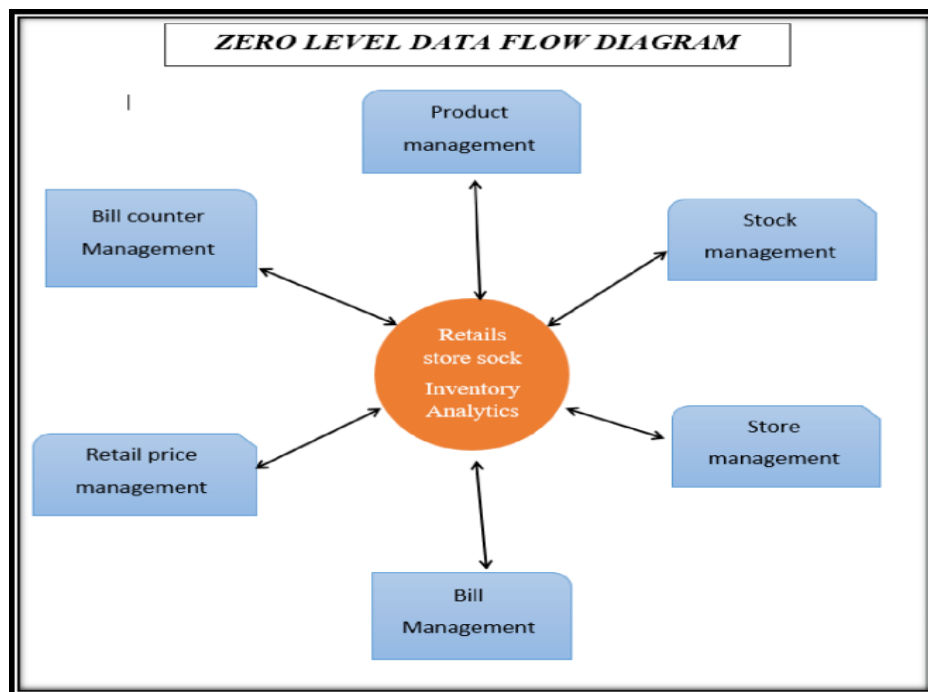

## 4.2 Non - Functional Requirements

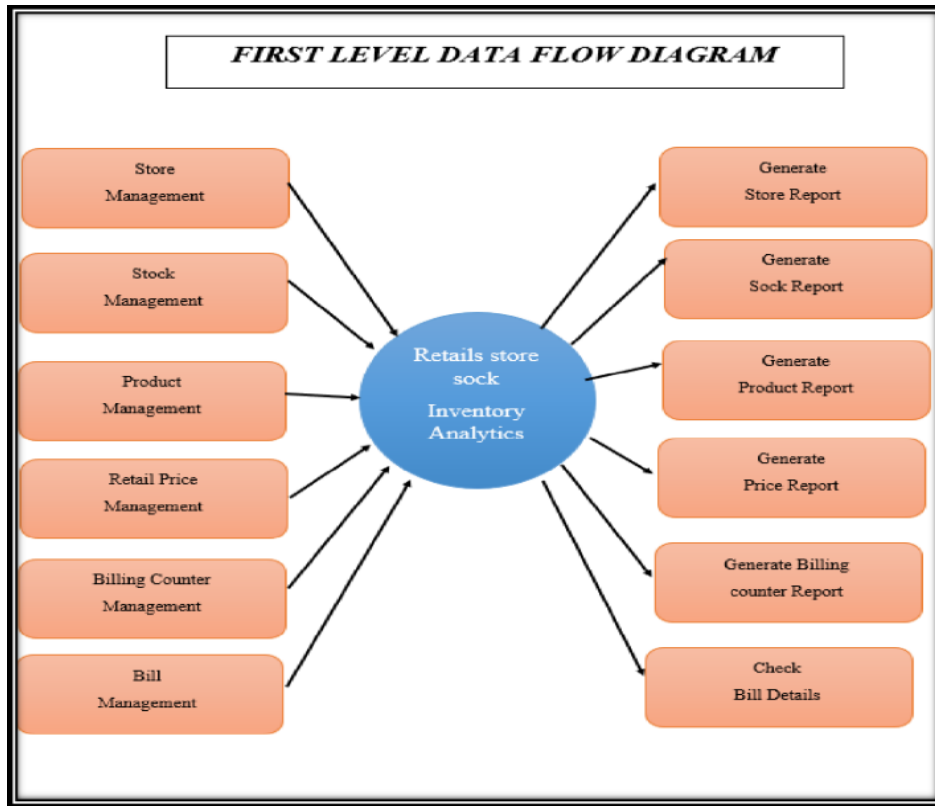

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	This system must be easy to use by both managers and chefs, such that they do not need to read an extensive number of manuals; it must be quickly accessible by both managers and chefs; it must be intuitive and simple in the way it displays all relevant data and relationships; and the menus of the system are easily navigable by the users with buttons that are easy to understand.
NFR-2	<b>Security</b>	The security requirements deal with the primary security. Only authorized users can access the system with username and password of administrator.
NFR-3	<b>Reliability</b>	The system must give accurate inventory status to the user continuously. Any inaccuracies are corrected by regularly comparing the actual levels to the levels displayed in the system. The system must successfully add any recipe, ingredients, vendors, or special occasions given by the user and provide estimations and inventory status in relevance to the newly updated entities.

NFR-4	<b>Performance</b>	<p>The system must not lag, because the workers using it don't have downtime to wait for it to complete an action.</p> <p>The system must successfully complete updating the databases, adding new recipes, ingredients, vendors, and occasions every time the user requests such a process.</p> <p>All the functions of the system must be available to the user every time the system is turned on.</p> <p>The calculations performed by the system must comply with the norms set by the user and should not vary unless explicitly changed by the user.</p>
NFR-5	<b>Availability</b>	<p>The software will be available only to the administrator of the organization and the product as well as customer details will be recorded by him. He can add customers, Update and delete them as well as add new products and manage them</p>
NFR-6	<b>Scalability</b>	<p>The ability of a system to handle a growing amount of work.</p>

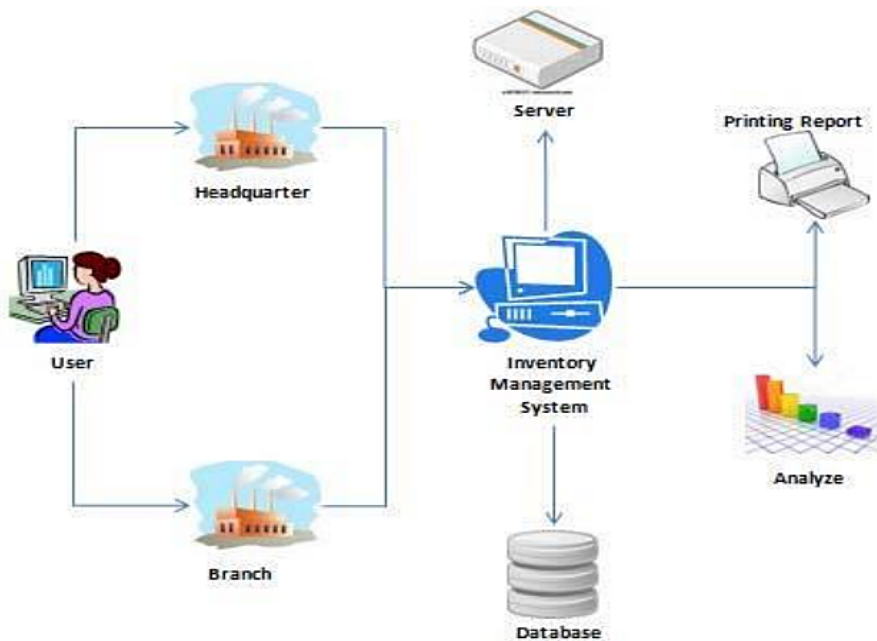

## 5. PROJECT DESIGN

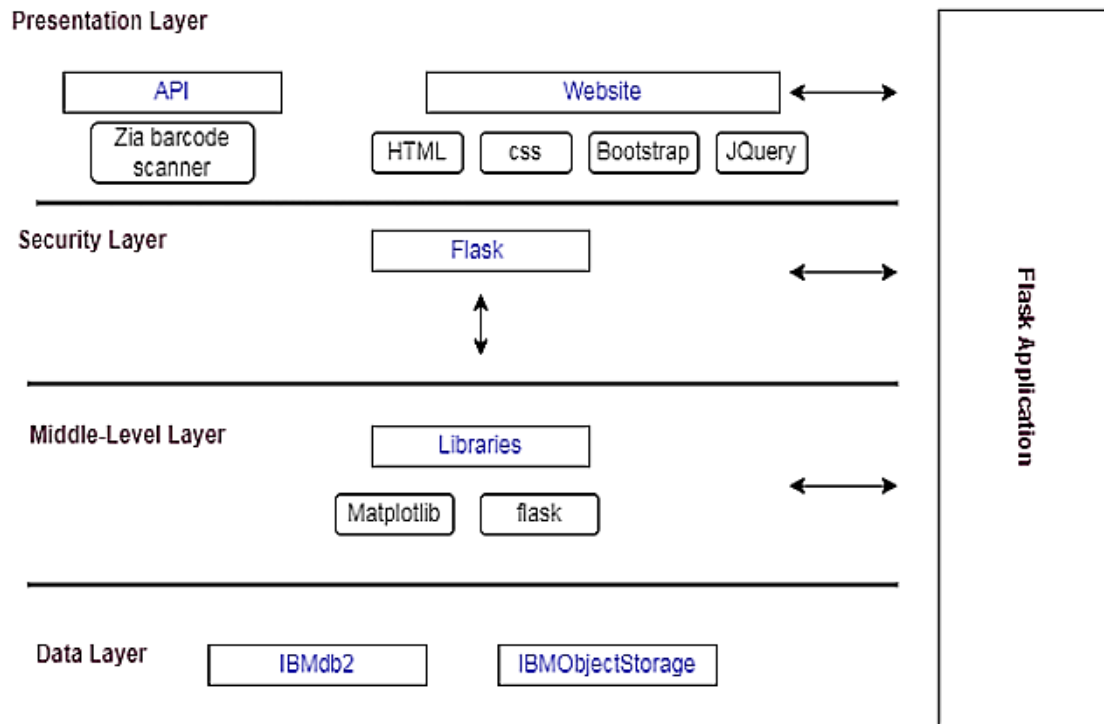

### 5.1 Data Flow Diagrams

## 5.2 Solution & Technical Architechture

### 5.3 User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, after completing the registration I will receive confirmation email once I have registered for the web application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can register & access the dashboard with Gmail login	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password after installing the web application.	I can access the dashboard by login into the application	High	Sprint-1
	Dashboard	USN-6	As a user, I can view the charts and graphs representation of the dataset and the information shown in the dashboard.	I can analyse the stocks in my retail store.	High	Sprint-1
Customer (Web user)		USN-1	As a user, I can register for the web application entering my email, password and confirming my password.	I can access my account dashboard	High	Sprint-1
		USN-2	As a user, after completing the registration I will receive confirmation email once I have registered for the web application	I can receive confirmation email & click confirm	High	Sprint-1
Administrator		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can register & access the dashboard with Gmail login	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password after installing the web application.	I can access the dashboard by login into the application	High	Sprint-1
	Dashboard	USN-6	As a user, I can view the charts and graphs representation of the dataset and the information shown in the dashboard.	I can analyse the stocks in my retail store	High	Sprint-1
Customer Care Executive		CCE-1	As a customer care executive, I will always be available for the interaction with the customer to clarify the queries.	An executive will analyse the customer complaints and rectify their problems.	High	Sprint-2
Administrator		ADMIN-1	As an administrator, I will manage backup and recovery, data modelling and design, distributed computing, database system, and a data security	Administrator can evaluate, design, review and implementing a data and they are also responsible for updating and maintaining the data	High	Sprint-2

## 6. PROJECT PLANNING & SCHEDULING

## 6.1 Sprint Planning & Estimation

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	19 Nov 2022	20	19 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	19 Nov 2022	20	19 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	20	19 Nov 2022

### Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

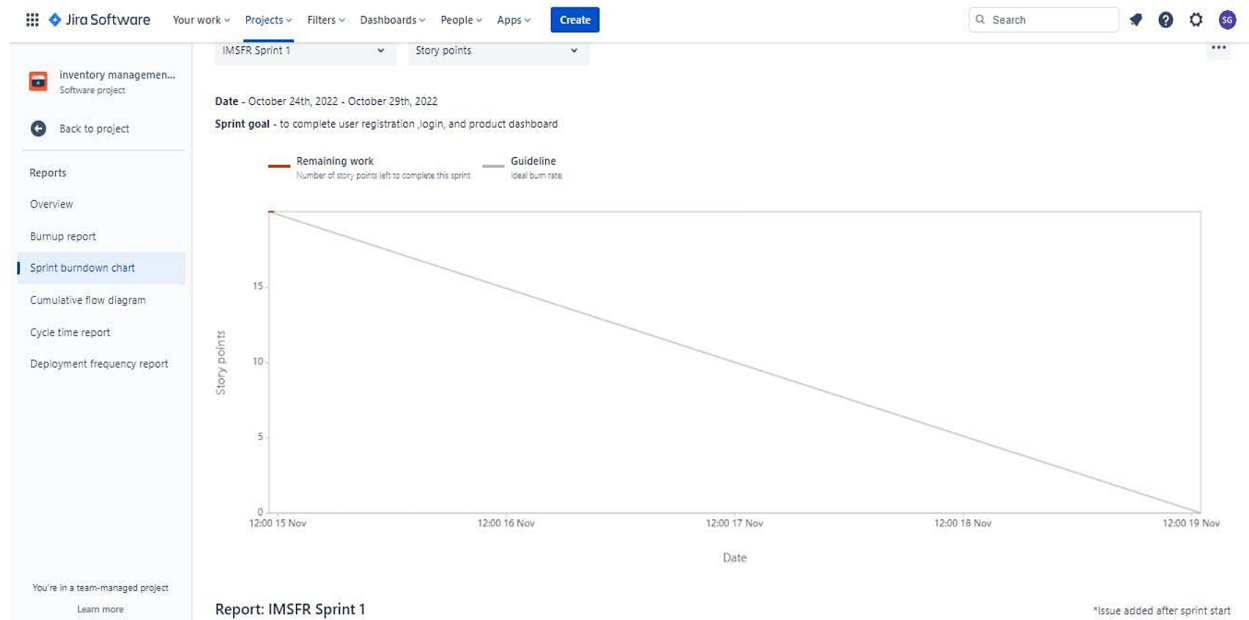

## 6.2 Sprint Delivery Schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering Mobile Number, password, and confirming my password.	5	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint-1		USN-2	As a user, I will receive the OTP once I have registered for the application.	5	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint-1	Login	USN-3	As a user, I can log into the application by Mobile Number & password.	3	Low	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint-2		USN-4	As a Branch User, I can log into the application by Branch ID & Password.	8	High	B. Kirandharshan R. Govindaraj
Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
						R. Prathap B. Sriganth
Sprint-2	Dashboard	USN-5	As a User, I must able to see the products details & availability.	5	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint-2	Inventory	USN-6	As a Branch user, I should able to upload the products and delete the products.	2	Medium	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 2		USN-7	As a Branch User, I should get the alert on stock is unavailability.	5	Medium	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 1	Order	USN-8	As a User, I should able to Order products on the App	5	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 1		USN-9	As a User, I should able to pay in a secure payment gateway method.	2	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 3		USN-10	As a User, I should able to get the ordered products on time.	8	Low	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 4	Maintenance	USN-1	As administrator, I should be able to edit details of the App.	20	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 3	Feedback	USN-1	I should able to get the Feedback from the Users.	8	High	B. Kirandharshan R. Govindaraj R. Prathap B. Sriganth
Sprint 3		USN-2	I should be able to give response to the customers so I should implement the Chatbot.	4	High	B. Kirandharshan R. Govindaraj
Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
						R. Prathap B. Sriganth

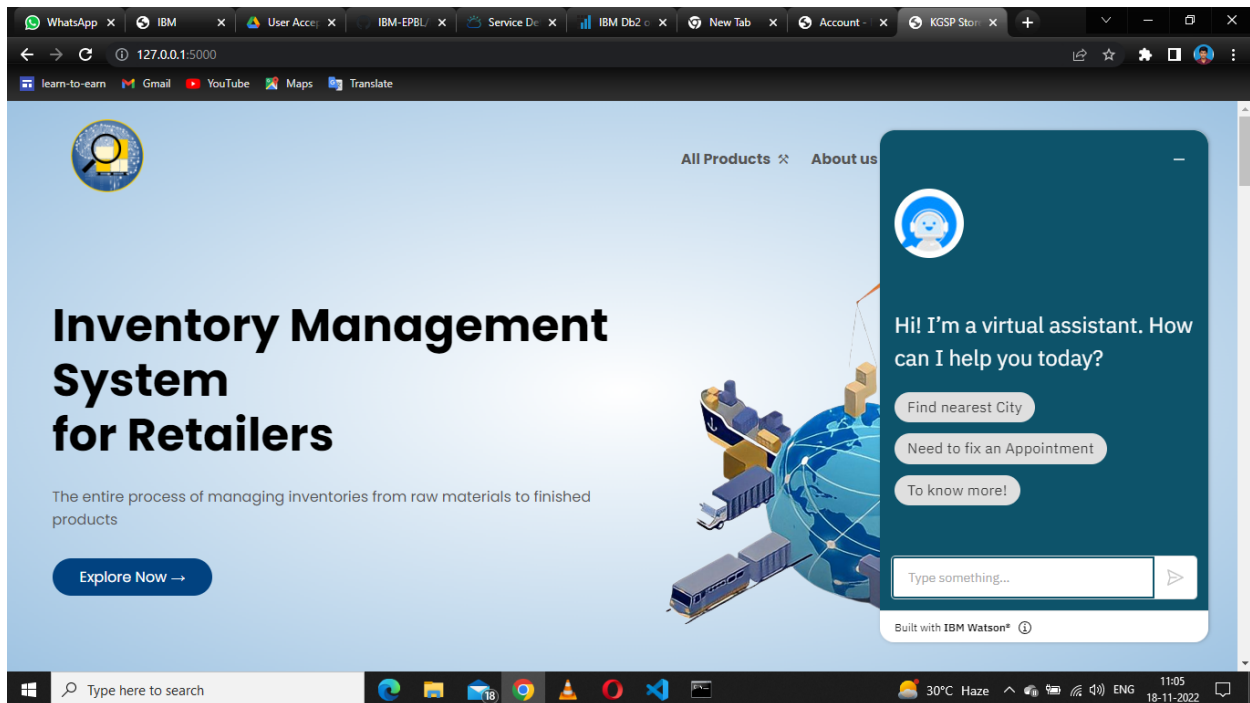

## 6.3 Reports from JIRA

## 7. CODING & SOLUTIONING

### 7.1 Feature 1 ( IBM Watson Chatbot)

```
<script>
  window.watsonAssistantChatOptions = {
    integrationID: "87ad3502-2685-48d1-bbdd-96ed7b353f93", // The ID of this integration.

## 8. TESTING

### 8.1 Test Cases

Testcases Report

				Date	18 Nov-22								
				Team ID	PNV2022/TMC/0817								
				Project Name	Inventory Management System for Retailers								
				Maximum Marks	4 marks								
t case ID	Feature Type	Component	Test Scenario	Pre-Requlite	Steps To Execute	Test Data	Expected Result	Actual Result	Status	Comments	TC for Automation(Y/N)	BUG ID	Executed By
sgc_TC_001	Functional	Home Page	Verify user is able to see the Login/ Signup popup when user clicked on My account button		1.Enter URL and click go 2.Click on My Account dropdown button 3.Verify login/Signup popup displayed or not		Login/Signup popup should display	Working as expected	Pass				Kirandharshi
sgc_TC_002	UI	Home Page	Verify the UI elements in Login/ Signup popup		1.Enter URL and click go 2.Click on My Account dropdown button 3.Verify login/Signup popup with below UI elements: a)email text box b)password text box c.Login button d.New customer? Create account link e.Last password? Recovery password link		Application should show below UI elements: a)email text box b)password text box c.Login button with orange colour d.New customer? Create account link e.Last password? Recovery password link	Working as expected	Fail	Steps link not clear to follow		BUG-1234	Prathap
sgc_TC_003	Functional	Home page	Verify user is able to log into application with valid credentials		1. Enter URL(https://shopzper.com/) and click go 2.Click on My Account dropdown button 3. Enter valid username/email in Email text box 4. Enter valid password in password text box 5.Click on login button	Username: chalam@gmail.com password: Testing123	User should navigate to user account homepage	Working as expected	Pass				Gowindaraj
sgc_TC_004	Functional	Login page	Verify user is able to log into application with invalid credentials		1. Enter URL(https://shopzper.com/) and click go 2.Click on My Account dropdown button 3. Enter invalid username/email in Email text box 4. Enter valid password in password text box 5.Click on login button	Username: chalam@gmail.com password: Testing123	Application should show 'Incorrect email or password' validation message.	Working as expected	Pass				Singeth
sgc_TC_005	Functional	Login page	Verify user is able to log into application with invalid credentials		1. Enter URL(https://shopzper.com/) and click go 2.Click on My Account dropdown button 3. Enter valid username/email in Email text box 4. Enter invalid password in password text box 5.Click on login button	Username: chalam@gmail.com password: Testing12345678901234567890	Application should show 'Incorrect email or password' validation message.	Working as expected	Pass				Prathap
sgc_TC_006	Functional	Login page	Verify user is able to log into application with invalid credentials		1. Enter URL(https://shopzper.com/) and click go 2.Click on My Account dropdown button 3. Enter invalid username/email in Email text box 4. Enter invalid password in password text box 5.Click on login button	Username: chalam password: Testing12345678901234567890	Application should show 'Incorrect email or password' validation message.	Working as expected	Pass				Kirandharshi

### 8.2 User Acceptance Testing

## 1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the [Product Name] project at the time of the release to User Acceptance Testing (UAT).

## 2. DefectAnalysis

This report shows the number of resolved or closed bugs at each severity level, and how

they were resolved

Resolution	Severity1	Severity2	Severity3	Severity4	Subtotal
By Design	10	3	2	3	20
Duplicate	1	0	3	0	4
External	2	3	0	1	5
Fixed	9	2	1	13	17
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	1	1
Won'tFix	0	4	2	1	2
Totals	22	12	10	19	50

### 3. Test Case Analysis

This reports how is the number of test cases that have passed, failed, and untested

Section	TotalCases	Not Tested	Fail	Pass
PrintEngine	7	0	0	7
ClientApplication	19	0	0	19
Security	2	0	0	2
OutsourceShipping	3	0	0	3
ExceptionReporting	3	0	0	3
FinalReportOutput	3	0	0	3
VersionControl	1	0	0	1

## 9. RESULTS

### *9.1 Performance Metrics*

- ✓ **Formal code metrics** - Such as Lines of Code (LOC), code complexity, Instruction Path Length, etc. In modern development environments, these are considered less useful.
- ✓ **Developer productivity metrics**—Such as active days, assignment scope, efficiency and code churn. These metrics can help you understand how much time and work developers are investing in a software project.
- ✓ **Agile process metrics**—Such as lead time, cycle time and velocity. They measure the progress of a dev team in producing working, shipping-quality software features.
- ✓ **Operational metrics**—Such as Mean Time Between Failures (MTBF) and Mean Time to Recover (MTTR). This checks how software is running in production and how effective operations staff are at maintaining it.
- ✓ **Test metrics**—Such as code coverage, percent of automated tests, and defects in production. This measures how comprehensively a system is tested, which should be correlated with software quality.
- ✓ **Customer satisfaction**—Such as Net Promoter Score (NPS), Customer Effort Score (CES) and Customer Satisfaction Score (CSAT). The ultimate measurement of how customers experience the software and their interaction with the software vendor.

## PERFORMANCE TESTING

Performance Testing

Date	18-Nov-22
Team ID	PNT2022TMD19817
Project Name	Inventory Management System for Retailers
Maximum Marks	4 marks

NFT - Risk Assessment									
S.No	Project Name	Scope/Feature	Functional Changes	Hardware Changes	Software Changes	Impact of Downtime	Load/Volumen Changes	Risk Score	Justification
1	Inventory Management System for Retailers	New	Low	No Changes	Moderate	Nil	>5 to 10%	ORANGE	As we have seen the changes

NFT - Detailed Test Plan				
S.No	Project Overview	NFT Test approach	Assumptions/Dependencies/Risks	Approvals/SignOff
1	Inventory Management System for Retailers	Passed	No Risks	Approved

End Of Test Report									
S.No	Project Overview	NFT Test approach	NFR - Met	Test Outcome	GO/NO-GO decision	Recommendations	Identified Defects (Detected/Closed/Open)	Approvals/SignOff	
1	Inventory Management System for Retailers	Passed	Requirement Satisfied	No Failure	Action Stop	No more recommendations	Closed	Approved	

## 10. ADVANTAGES & DISADVANTAGES

### Advantages

- ★ **It helps to maintain the right amount of stock:** contrary to the belief that is held by some people, inventory management does not seek to reduce the amount of inventory that you have in stock
- ★ **It leads to a more organized warehouse:** with the aid of a good inventory management system, you can easily organize your warehouse.
- ★ **It saves time and money:** an effective inventory management system

can translate to time and money saved on the part of the business.

### *Disadvantages*

- **Impersonal touch:** another disadvantage of inventory management is a lack of personal touch.
- **Complexity:** some methods and strategies of inventory management can be relatively complex and difficult to understand on the part of the staff.

## **11. CONCLUSION**

Inventory management is a very complex but essential part of the supply chain. **An effective inventory management system helps to reduce stock-related costs such as warehousing, carrying, and ordering costs.**

## **12. FUTURE SCOPE**

- ▶ The scope of an inventory system can cover many needs, including **valuing the inventory, measuring the change in inventory and planning for future inventory levels.**
- ▶ The value of the inventory at the end of each period provides a basis for **financial reporting** on the balance sheet.
- ▶ The scope of an inventory management system can cover many needs, including valuing the inventory, measuring the change in inventory and **planning for future inventory levels.**

- ▶ The application of computer system in inventory control is **to ensure that immediate availability of much more complete data for use in making purchasing and related material decisions because of its speed.**
